

PIVOT DESK

Our Pivot Desk rotates 360 degrees. Set it up virtually anywhere in a room, then move it as you're working from it. The kidney bean shape allows you to lean into the desk comfortably. A cord porthole manages computer and light cords. The three-drawer storage cabinet is on casters and also rotates 360 degrees, independently of the desk. Roll it under the desk, beside it, facing your chair or away from it.

1 Attaching the casters

Set the desk legs upside down and twist the locking casters (J) into the bottom of each leg.

Set the file cabinet on its top, and attach the locking casters (H) and regular casters (I) at opposite corners with 4 wood screws (D) per caster.

2 Attaching the legs

Set the desk top upside down on a clean, flat surface. Attach the legs to the bottom of the desk top by inserting a screw (C) through the locking washer (B) and regular washer (A) and into the top.

Be sure to fully tighten the bolts to avoid damage or injury.

3 Attaching the side cabinet

Set the desk top over the cabinet so that the pivot mechanism lines up over the predrilled holes in the storage cabinet top. Insert a machine screw (E) through the locking washer (B) and regular washer (A). Insert the screw through the underside of the cabinet into the pivot mechanism.

Be sure to fully tighten the bolts to avoid damage or injury.

4 Attaching the handle and rails

Open the bottom drawer and align the handle (K) with the predrilled holes on the front of the drawer. Insert 2 machine screws (F) through the back of the drawer into the handle and tighten.

Set the file rails across the side of the drawer.
